DISCLAIMER

This report is simply used to pass on the data. The members in the purchasing kindly painstakingly read the white paper and the authority site of the applicable directions, and thoroughly comprehend the blockchain just as computerized resources.

Kindly notification the possible dangers, and completely survey your danger resistance and genuine Situation to settle on reasonable choices.

INTRODUCTION

INTRO

Blockchain technology has brought about many new ways for individuals to earn yields. In most cases, the returns on cryptocurrency far exceed those offered by traditional financial institutions. However, many platforms offer yields that are simply unsustainable, with tokens that derive their value from nothing but hype and speculation. But we come here with a token which will be priced on its organic and genuine value not by hype and manipulation.

THE POWER OF DEFI

Decentralized finance (DeFi) has the potential to disrupt all traditional financial institutions, including banking, finance, and insurance, by cutting out the middleman and putting power in the hands of investors. But the growth of DeFi is contingent upon legitimate and innovative use cases.

What is Legendary Lion?

Legendary Lion token (\$LION) is a token that uses BEP-20 technology.

Legendary LioN is fully integrated into the DeFi ecosystem on BSC, meaning our native token is usable on any third party BSC DeFi protocol. It is a DeFi platform specialized in crypto financial derivatives.

LEGENDARY LION will use as a financial option in different crypto platform as well as gaming site and igambling sites and of course in charitable programs and we want to grow in more fields and will use for more interesting upcoming future projects.

IDEA behind the name thought

We all know lion is the king of jungle , and the responsibility of a king to protect the kingdom, but as time flies, we see this one of the great animal species getting extinct from our mother earth . At the current rate, lions could go extinct by 2050. (source-AWF)

According to National Geographic, some 200,000 lions roamed across Africa a century ago. Today, there are less than 21000,In Indian Gir forest 650 lions living (last census 2017). so our team has decided to dedicate this token's name in the name of the king of jungle.

This token will not only use as defi financial platform but also a charity token and a profit percentage of our token will go for saving endangered animals for better future of our nature . we want to contribute in our nature's stability and our solution is LION token.

Name:	Legendary Lion Token
Symbol:	LION
Chain:	Binance Smart Chain (BEP-20)
Total supply:	1 Million

We will go with 10 percent of total supply for IDO, 5 percent for bounty, tournament and various contests and 25 percent will be stored and locked for dev, team, price stabily and also for future development. Rest of the token will be used defi operational purpose.

Usability of Lion Token

01

Best defi platform for finance purpose and financial solution

02

It can be used as main payment processor for crypto programs and crypto related programs (already some program admins are in talk with us)

03

Using as an alternative crypto token in igambling sites.

04

Useful for token in gamified earning sites and NFT sites (we have future plan for this too).

05

Use for a great cause for saving endangered animal, each you token buy will help to feed ,treat and save edagered animal.

06

It can be used as an asset and funding project for future developments.

Road Map

Q4 2021

IDO, launching Legendary Lion defi project, farming , staking, developing the site and adding new features .

**STEP
01**

Q2 2022

Making our own google play store and apple market app and also making our own set of NFT and games.

**STEP
02**

Q3 2022

More project updates more development and adding some unique defi feature which defi users never seen.

**STEP
03**

Q1 2022

Making deals with crypto programs , agreement with igambling platforms and also deal with different programs to use our token as their deposit and asset option.

our earning's some percentage of profit will go to save endangered animals and specially lion.

WHY?

why we have so less amount of token than other defi programs, will's hurt the project in future?

Good question, no it won't, we have all the blue print, blue print of success , we surveyed, monitored and researched over 80+ defi sites and then came in conclusion that if an honest transparent team work , the project get success and for keeping price upwards in an organic way we have to cap it in a reasonable amount, we can't farm or create more and more token for sake of money, scarcity and more usability is the the main source of token's price rise , not only that we will have asset stored for future projects it will also use for buy back and burn and continuous buy back and burn will increase its price like rocket so as fast you buy and join the program the more you will get from it.

Let the king of jungle rule with its golden glory and let the Legendary Lion Rise and Shine. GROOWWWLLLLLLL
